

Baranova Natalia

Frontend Developer

I'm a result oriented energetic front-end developer with experience in building web interfaces. Every day I work on my skills in this direction and expanding them with new knowledge. Currently I'm learning React Native. My plans is to learn ExpressJS. I solve katas on codewars.com. I value my own time very high, that's why it's better for me to have a remote work. But I can consider an office job too, depends on opportunities that it could provide me with.
