

Baranova Nataly

Frontend Developer

I'm a result oriented energetic front-end developer with experience in building web interfaces using React/Redux/TypeScript. Every day I work on my skills in this direction and expanding them with new knowledge. Currently I'm learning React Native. I solve katas on codewars.com and learn English in my free time on my own. I value my own time very high, that's why it's better for me to have a remote work. But I can consider an office job too, depends on opportunities that it could provide me with.

It's a shop of autoparts. I've made UI using native tools: html, sass, JavaScript and frameworks: bootstrap on a site, tailwind on a dashboard. I was working a bit with PHP on Laravel 8/9.
