Baranova Nataly

Frontend Developer

I'm a result oriented energetic front-end developer with experience in building web interfaces using React/Redux/TypeScript. Every day I work on my skills in this direction and expanding them with new knowledge. I solve katas on codewars.com and learn English and Spanish in my free time on my own. I'm gonna learn React Native. I value my own time very hight, that's why I'm looking for a remote work.

Work Experience

My coding life has begun from studying PHP on my own. I'm self-educated PHP-developer, I have some commercial experience on Yii-2, Symfony 5 and Laravel 8. Then I changed everything, tried React JS and I enjoyed it so much, that now I have graduated IT-INCUBATOR. I became a frontend developer and I wouldn't like to deal with backend any more, but know OOP and how things are made on a PHP backend.
