Baranova Nataly

Frontend Developer

I'm a result oriented energetic front-end developer with experience in building web interfaces using React/Redux/TypeScript. Every day I work on my skills in this direction and expanding them with new knowledge. The next my goal is to learn React Native. I solve katas on codewars.com and learn English in my free time on my own. I value my own time very hight, that's why I'm looking for a remote work.
